

Operations of Signed Numbers

Addition

$$2 + 3 =$$

$$2 + (-3) =$$

$$-2 + 3 =$$

$$-2 + (-3) =$$

Subtraction

$$A - B =$$

$$A + (-B) =$$

$$3 - 2 =$$

$$2 - 3 =$$

$$-3 - 2 =$$

$$-3 - (-2) =$$

Multiplication & Division

$$2 \cdot 3 \cdot 2 \cdot 3 \cdot 1 = 36$$

$$(-2) \cdot 3 \cdot 2 \cdot 3 \cdot 1 = -36$$

$$(-2) \cdot (-3) \cdot 2 \cdot 3 \cdot 1 = 36$$

$$(-2) \cdot (-3) \cdot (-2) \cdot 3 \cdot 1 = -36$$

$$(-2) \cdot (-3) \cdot (-2) \cdot (-3) \cdot 1 = 36$$

$$(-2) \cdot (-3) \cdot (-2) \cdot (-3) \cdot (-1) = -36$$

An odd number of negatives yields a negative result.

An even number of negatives yields a positive result.
